PROFESSIONAL SUMMARY

Full Stack Software Developer with hands-on experience in backend engineering, REST API design and scalable web application development. Solved 500+ LeetCode problems covering Data Structures, Algorithms. Experienced in building AI-powered, real-time systems using Java, Spring Boot, React.js, PostgreSQL and Python.

TECHNICAL SKILLS

Languages: Java, Python

Frontend: HTML5, CSS3, JavaScript

Backend: Spring Boot, REST APIs, Node.js

AI/ML: LLM Integration (Gemini AI)

Databases: PostgreSQL, MySQL

Tools & Platforms: Git, GitHub, Render, Vercel

WORK EXPERIENCE

AI Intern | GatewaySoftwareSolutions

- Developed a real-time crop suitability prediction system using DeepSeek and Mistral APIs **June 2025**
- Processed agricultural datasets and integrated AI-based recommendation workflows
- Collaborated on backend integration and scalable AI-driven data processing

EDUCATION

B.E. Computer Science Engineering — Dr. NGP Institute of Technology, Coimbatore, Tamil Nadu **2023 – Present**

CGPA: 7.74

HSC —AVP Trust National Matric School, Tirupur, Tamil Nadu **2023**
83%

PROJECTS

PR Reviewer | [GitHub](#) | [LiveDemo](#) | Java, Spring Boot, React, PostgreSQL, OAuth2, Webhooks, Docker **2026**

- Automated GitHub Pull Request reviews using Google Gemini AI for intelligent code analysis.
- Integrated GitHub OAuth2, Webhooks and REST APIs for secure event-driven review workflows.
- Designed a scalable Spring Boot backend with PostgreSQL for review orchestration and persistence.
- Built a React dashboard for repository management and AI review monitoring.

CivicPulse | [GitHub](#) | [LiveDemo](#) | Java, Spring Boot, React.js, PostgreSQL, WebSocket, JWT, Docker **2025**

- Engineered a real-time civic issue management platform with Citizen and Admin workflows
- Designed secure REST APIs using Spring Security and JWT authentication
- Implemented WebSocket-based real-time issue tracking and notifications
- Containerized and deployed the application using Docker, Render, and PostgreSQL

Forecasting Platform | [GitHub](#) | [Live Demo](#) | React.js, FastAPI, Python, Pandas, NumPy **2024**

- Built an AI-powered forecasting platform for predictive analytics
- Developed FastAPI services for CSV processing and forecasting workflows
- Integrated Gemini AI and implemented ARIMA and Holt-Winters models
- Designed automated trend analysis and business insight generation

CERTIFICATIONS & ACHIEVEMENTS

- Solved 500+ LeetCode problems focused on Data Structures, Algorithms, and optimization
- Completed certifications: Large Language Models (LLMs) and Generative AI
- Participated in a State-Level Buildathon and UI/UX design workshops
